EXPERIENCE - PRESENT

Sep 2014 until present	**Developer at Zeit.io GmbH** Worked together with other ruby developers on different projects for a several clients in Europe (mainly Germany). See some of the work under "Projects".
Oct 2012 until present	**Developer at Egressus** Egressus (Latin for 'landing') is a one-man company created to help small business owners sell their product or service online.
Feb 2014 until sep 2014	**Online Marketing at W3S** Worked full-time at the marketing department at W3S. I was responsible for new client acquisition and to help current clients optimize their online engagement.

DEVELOPMENT PROJECTS

Tripl.de	Tripl is a service that uses your interests from social media to find the best travel vacation for you. It runs on Ruby on Rails and AngularJS. I was responsible for creating the front-end of the website. I coded in Ruby, Slim, Coffee and Less.
EasyMarketing.de	EasyMarketing wants to automate most aspects of online advertising. The website is build with Ruby on Rails and AngularJS. Preprocessors used are Slim, Coffee and Sass.
MashNieuws.nl	WordPress-based news website that aggregates content from the most popular news sites and connects it with social media. Created this as a personal project, features include: custom PHP plugins, a unique theme and aggressive caching to handle a massive database.
JobSpot.no	A co-build website made together with a ruby programmer. JobSpot is a job board that gives insight into the office for your potential new work place. The website is built with Ruby on Rails, AngularJS, Sass and Slim. My main work was to code the front-end templates.

[Zeit.io](#)	I created this company website as a simple Ruby on Rails app with static templating. Preprocessors used are Slim and Sass.
[byVisor.com](#)	A Magento-based shop for ski clothes. The original designs I worked on are no longer live at the website after the buyout. You can still see them in the following Imgur album: http://markhagethorn.com/portfolio#visor
[ga-clothing.com](#)	Webshop made with Spree-commerce framework for Ruby on Rails. I worked on several landingpages and checkout. Built with Sass, Slim and Ruby.
[vvFlits.nl](#)	WordPress-based website I made for free for a local volleyball club. It uses simple templates for viewing teams/pages and the API from [nevobo.nl](#) for showing current standings and upcoming matches.

EXPERIENCE - PAST

Aug 2011 t/m jan 2013	**Developer at Ordify GmbH** Ordify is an app by the company that made it possible to order food in any restaurant using QR-codes. My job was to code the company website and help develop the app which we made with PhoneGap. The actual UI of the app was made with HTML and SCSS instead of native platform code.
Sept 2008 t/m mid 2011	**Advertising consultant at DuoBlogger** As the owner of several blogs with high traffic, a friend and me blogged and advised other website owners to generate more revenue through Google AdSense and other advertising programs with their website.
Okt 2008 tot feb 2011	**Part-time postman at TNT** During my Business Economics study I worked for TNT as a postman.
Okt 2007 t/m okt 2008	**Part-time assistant at KE Expedititie** Work at KE Expeditie . Mijn werk bij KE was het ondersteunen van de Nederlandse transport afdeling met haar administratie.
Juli 2006 t/m Okt 2007	**Part-timer assistant accountant bij Flynth** Through a companies scholarship I found a place to work at Flynth. My responsibilities were to assist senior accountants.
Okt 2005 t/m Okt 2006	**Part-timer at Cum Laude Events**, *horecamedewerker* At Cum Laude Events I worked at several big soccer like Feyenoord or NAC.

SKILLS

Knowledge working in a professional environment with the following coding languages:

HTML
CSS
Javascript
Ruby
PHP

All these languages have their own frameworks/MVC's. I worked with several of them, including:

Ruby:	Ruby on Rails	
Javascript:	jQuery	AngularJS
PHP:	WordPress	
HTML & CSS:	Twitter Bootstrap	Foundation

My regular workflow includes:
• Read up on the latest updates in my field.
• Setting up websites on a local machine.
• Being able to work with Ubuntu servers, including maintenance.
• Version control with Git.
• Working with preprocessors for HTML & CSS, which include LESS/SASS for CSS and SLIM/HAML for HTML.
• Cross-browser testing websites and making sure they work in Internet Explorer 8 and up.
• Optimizing websites to load faster (e.g. caching, minimizing/refactoring).
• Pair programming through remote connection.
• Able to program on either Windows or Mac.
• Using Slack for team communication.
• Experience with Agile method of development. This includes web-based planning such as Trello.

Other workflow items:
• I like to place myself in the shoes of an end-user of the product I'm creating, and adjust the design to create a better user experience.
• Can edit nearly everything in Photoshop as far as web design goes.
• Experience with video-editing through Premiere Pro.
• Reading information by professionals on search engine optimization.

EDUCATION

2009 – 2013   Rotterdam University of Applied Sciences, Bachelor Communication: Specialisation Digital Media
